

D'lecta[™]

ARE YOU FEEDING SUGAR
TO YOUR DIABETIC PATIENTS
UNKNOWINGLY?

HOW DO YOU SERVE MILK TO YOUR PATIENTS?

Are you serving dairy whitener/powder creamer to your patients?

Do you know that dairy whitener contains 20% sugar?

The proportion of sugar in powder creamers is even higher.
Is this what you should be serving your diabetic patients?

THE CHALLENGE OF SERVING MILK WITH TEA IN HOSPITALS

In a hospital environment the chances of contamination are very high. Milk is prone to contaminate quickly if not stored properly. We offer a perfect 'milk' product that is not only safe as it is packed aseptically but it also delivers a great beverage experience.

D'lecta™

ALL ABOUT

Milké is the first ever real milk liquid creamer in India. As the name suggests, Milké is made from pure cow's milk with no added sugar or preservatives.

Milké is packaged in convenient ready-to-use cups.

Milké does not require any boiling and can be stored without refrigeration.

Milké has a shelf life of 6 months.

***Delicious Rich Milk
Perfect for Tea & Coffee***

D'lecta™

BENEFITS TO HOSPITAL

- Portion pack, helps in dietary control
- Does not contain added sugar, so it can be given to diabetic patients
- Very cost effective as it whitens as much as one and a half powder sachets
- Premium beverage experience for patients which in turn enhances the image of the hospital
- No wastage, hygienic
- Cannot be adulterated / tampered with

WHY CHOOSE MILKÉ?

★★★★★ Almost all 5 Star Hotels and Leading Airlines use Milké
